

CCDC Inject

INJECT NAME	Develop a Solution to Run a Linux App on Windows
INJECT ID	VIRT01A

INJECT DESCRIPTION:

The organization has a number of Linux-based business applications that we may need to run on a Windows platform as part of a disaster recovery plan. Develop two solutions, including containers, for running Linux applications on Windows. Compare and contrast the benefits and limitations, then recommend one.

INJECT DELIVERABLE

Respond with a business memo that details the two solutions. Provide a section that clearly identifies the benefits and limitations of each, then recommend one. Provide justifications for the recommendation.
