

CCDC Inject

INJECT NAME	Configure SSL Decryption on PA Firewall
INJECT ID	TOOL12T

INJECT DESCRIPTION:

Configure SSL Decryption on the Palo Alto Firewall. Use a self signed certificate to complete the configuration.

INJECT DELIVERABLE

Prepare a clearly written business memo that outlines the steps taken to configure SSL decryption. Include screen shots to document that these were completed. Describe why SSL decryption is useful, and if there are any traffic flows (sites) that should not be permitted to be decrypted and why.
