

To: CCDC
From: Team 14
Subject: Memo Analyzing Skills in Context of Needs

Technical Elements Being Managed:

Firewall	Management Configuring and defending perimeter firewalls
Windows	Servers Active Directory
Linux	Servers host applications, web servers, and database services.
Applications	Monitoring and defending applications like databases
Endpoint Security	Managing antivirus, endpoint protection, and vulnerability scans.

Evaluation of Team Skills:

Firewall Management	Limited knowledge of complex configurations
Windows Servers	Limited knowledge
Linux Servers	Limited experience for advanced scripting and automation
Network Devices	Limited experience in advanced routing protocols
Applications	Weak coverage for database security
Endpoint Security	limited ability to manage vulnerabilities

Team Strengths:

Communication: Sharing information and coordinating efforts during incidents

Linux Basics: Team members can manage basic Linux server configurations and web applications

Team Weaknesses:

Firewall Management: Only two team members have some experiences

Advanced Linux Administration: Limited scripting and automation skills

Network: Insufficient experience in advanced networking
