

CCDC Inject

INJECT NAME	Develop Script to Monitor for Incomplete TCP Conn
INJECT ID	LINX10T

INJECT DESCRIPTION:

Develop a Linux shell script to monitor for incomplete TCP connections. The script should be run periodically (every few minutes) in a CRON job and alerts sent to a log file that can be reviewed periodically.

INJECT DELIVERABLE

Respond with a business memo that shows the developed script, a screen-shot of its functionality, and the job in the CRON queue that implements it. This should run on each Linux server.
