

Use this inject as a means of file sharing screen shots and other files. Files can be uploaded as 'responses' to this inject, and downloaded by other team members.

File size should be limited to 10 MB.

This inject is to be used strictly to share files between team members. It is the responsibility of teams to construct PDF responses to appropriate injects. Judges will not explore the files submitted on this inject for evidence of inject completions.

Communication to the judging team, say via Tech Support, directing them to view submissions to this inject in lieu of missing or incomplete inject submissions, will be ignored.
