

# CCDC Inject

<b>INJECT NAME</b>	Response to Breach
<b>INJECT ID</b>	LEGP09A

**INJECT DESCRIPTION:**

Your organization has captured network packets being exfiltrated to unauthorized destinations. In the packets are signs of individual customer data along with their profiles. Some of these customers are citizens of France, Germany and Italy, where your organization has offices and other facilities. What is the organization obligated to do in with regard to these non-US jurisdictions in addition to securing the data from further unauthorized access ? What happens if these next steps aren't taken. What regulatory framework is involved.

**INJECT DELIVERABLE**

Prepare a clearly written business memo that enumerates the central regulatory framework that needs to be followed. Identify the specific step(s) that need to be taken and the penalty for non-compliance.
