

# CCDC Inject

<b>INJECT NAME</b>	Assess the Vulnerabilities of Internal Devices
<b>INJECT ID</b>	EVAL05T

## **INJECT DESCRIPTION:**

Use a vulnerability assessment tool, such as OpenVAS to gain visibility into the internal network device vulnerabilities. Evaluate each device and note the vulnerabilities that were found in the exposed services.

## **INJECT DELIVERABLE**

Create a business memo that describes the process taken and identifies the tool used. Include:

- Evidence (screen shots) of the tool running together with evidence of the results of the scan
- A table, as in the following example:

Device	Service	Analysis of Vulnerabilities
