CCDC Inject

INJECT NAME	Script to Monitor Disk Space
INJECT ID	WINS05T

INJECT DESCRIPTION:
Develop a Power Shell Script to monitor disk space. Alerts should trigger at the 50%, 80% and 90% thresholds. Alerts can be facilitated as log entries, SNMP traps, or email messages. The script can run as a detached process or Cron/AT job.

INJECT DELIVERABLE
Respond with a business memo that shows the developed script. Identify how you are sending alerts and how often the script will run. Also, describe how the script is executed.
