CCDC Inject

INJECT NAME	Linux Script to Monitor Disk Space
INJECT ID	LINX04T

INJECT DESCRIPTION:
The IT Director is concerned that a potential denial of service attack could be accomplished by filling up all available disk space. This could be malicious, or an error in a software application,

Develop a script for the Linux servers that will be monitor disk space via CRON job and alert if a parameterized threshold is exceeded, via a syslog entry.

INJECT DELIVERABLE
Prepare a business memo that presents the script, together with screenshots that show the working script and syslog entry reporting the threshold exceeded.
